

**CodingWebU.com™**

*Providing Quality Education at Affordable Prices*

*CodingWebU's Code Finder* and *Claim Scrubber* not only offers professional coders a faster and more comprehensive alternative to using coding books, but it is a live system that is constantly evolving. As codes, policies or payer interpretations change, the *Code Finder* will update the system so the learner has the latest available information.

*CodingWebU's Code Finder* also give users access to a *Claim Scrubber* that will check the assigned codes for any issues that could cause claim delays or denials. Simply list the codes you plan to include on the claim and the scrubber will tell you if your codes are incompatible, identify any bundling issues or modifier problems.

Coding can now be like having an expert looking over your shoulder, helping you code faster and smarter and ensuring accurate coding for your emergency physicians.

- Costs less than a complete set of coding books!
- Much faster code searches!
- All codes always up-to-date!
- Includes information not available in books!

### **What is included?**

- ICD-9-CM codes, the *Code Finder* provides codes at the highest level of specificity as required for correct coding. If displayed, it is valid to put on a claim form.
  - If there are any notes associated with a diagnosis code, this is indicated with a dagger symbol (†). To see the note, just move your mouse cursor over the code.
- HCPCS codes with CMS descriptions
- CPT® codes with AMA descriptions
- Medicare reimbursement specific to your state
  - The *Code Finder* will ask you for your location when you do your first CPT® search. This is required in order to provide you with the Medicare allowable fees for your location. If you code for emergency physicians in multiple areas, you can change the location with just a click of the mouse.
- Current RVU's
- CMS global periods
  - To see the Medicare reimbursement fees, RVU's, and global periods, search for a CPT® code and hover your mouse cursor over the code (Medicare does not publish reimbursement values for all procedures).
- Information from CMS NCD's and LCD's
- Modifiers as published by the AMA
- Place of service codes as defined by CMS
